HONOULIULI RANCH.

A Very Large Reservoir to Be Constructed to Hold a Million and a Half Gallons of Water.

Mr. H. M.von Holt, superintendent of ranches for the O. R. & L. Co., is having constructed on the Honouliuli ranch, about five miles from the new Ewa plantation works, a storage reservoir which when completed and full of water will be about 1250 feet long by 150 feet wide, and have a depth of water at the dam of 15 feet. pan, impervious to water, was found. This was then filled up with earth only, and packed down, and over this the dam of earth is being built. When completed it will be about 50 feet wide on the middle bottom, sloping upwards to a width of 10 feet on top, 160 feet across the gulch and 17 feet high. The dam is situated on one of the large plains extending from the easterly slopes of the Waianae mountains, while deep ravines on either side of the plateau will prevent any chance of mountain freshets. Two guiches starting from zero on the plain about half a mile from the mountains and a quarter of a mile apart run nearly parallel for about a mile, where they join, running out to the plain again at zero. The dam is a quarter of a mile below the junction of the gulches, and the reservoir when filled with water, as be backed up as far as this junction. The reservoir will be fenced off and water led into troughs below the dam through a two-inch pipe, so that the stock can have clean and clear water. The survey, plans and detail of work were furnished by Mr. G. C. Allardt, civil engineer, who returned on Monday afternoon from inspecting the progress of the work. A gang of twenty Chinese are doing the clay beds in both gulches continues to flow quite a stream until the middle of June. This supply, together with what storm water may fall on the plains, and flow into the gulches, will be utilized to fill the reservoir, a wasteway being provided for the overflow. Mr. Allardt estimates the reservoir when full to hold 1,500,000 gallons of water, which once

LEPROSY IN TRINIDAD.

A recent article in the London converting the asylum into a prison. The rate of mortality was the same for 1889 as for 1888, 7.4 per cent. He is not prepared to admit that leprosy is contagious in the ordinary sense of the word, but considers segregation necessary as lessening the number of infected foci. Onethird of the cases are coolies from India, who may have taken the infection in India. He has made various experiments at innoculation without success. Chaulsnoogra oil has been efficacious in alleviating the disease and acolin a valuable antiseptic. He has treated perforating ulcer, by free incision right through the foot. Bacilli are rarely found in the kidneys, and the lessening of these organs is attributed to mal-nutrition of the skin, more chronic in anesthetic than in tuber- world its importance among the cular cases. The diagnoses between congenital syphilis and early leprosy is difficult. Red iodide of mercury ointment in tubercular cases is dis-

Chinese Clans.

The London Times says that Capt. Lang made great progress for one or two years in re-organizing the Chinese navy. The men proved excellent seamen. But the difficulty was with the officers, whose native self-conceit turned their heads and made them careless of duty. They sought to introduce the clan system | 000 a year, of which France, Belinto the navy, a policy destructive giam and England get the largest of all discipline. The Focchow men share. The country has 5000 miles sought not only to monopolize all of railways in operation and posthe amendments, but to make the sesses numerous schools and col-Admiral or the commanding officer subservient to the demands of the secret organization, bound together by such obligations that no member dares to oppose the decisions of the officials of the brotherhood. This it is that swamps every enterprise undertaken by Chinese. This is the fate which is not looked upon as a service for the safety of the empire. but as a milch cow for the benefit of the members of a certain clan.

Shortly after 6 o'clock Tuesday morning the residence of Mr. Antone Vogel at Waikiki just beyond the bridge was burned to the ground. Very little was saved. The house was owned by Mr. Geo. West and was insured for \$2,000 with Hon.J.S. Walker, in the Union Insurance Company of New Zealand, Mr. Vogel's effects were insured for \$1,250.

The Delicacies and Intricacies of an International Exchange and Civil-

(From the Ohio State Journal.)

We appropriate the following from a private letter from General Comly, formerly American Minister

Resident at Hawaii: Do you know what it is to the Minister to have a man-of-war visit his port? First, the Admiral sends his staff-officer to report his arrival. Then they take a drink. Then the A trench or puddle dam was dug | Minister runs up his flag, and sends through the fall of the gulch to a a dispatch to the Minister of Fordepth of from 3 feet on the ends to eign Affairs, notifying His Majesty's 7 feet in the centre, where a hard government that the Admiral has arrived, and desires to salute the flag. Then His Excellency replies, and sets the time when the Admiral may shoot, and His Majesty's big guns will be all loaded ready to reply, gun for gun. Then the bombardment takes place. Then the Admiral calls on the Minister, with his staff and all their good clothes. Then they all drink. Then the Minister goes aboard the man ofwar in his good clothes and the Admiral's yawl. Then they all drink. When he leaves the vessel, after being presented arms to, all kinds of bother, he only gets about thirty yards away when his ears are torn and his head burst by the big guns of the vessel firing a fifteen-gun salute. The marines have their oars peaked and their eyes on the Minister, and he is expected to take off his hat and give horribly a ghastly smile, as if he really enjoyed the honor of having it is hoped by the winter rains, will his head burst in this way. Then the Admiral comes ashore with his staff, and the Minister takes him to call upon His Majesty's government. We go first to the Minister of Foreign Affairs, who tells us when we may have an audience at the palace, to present the Admiral and other officers to His Majesty. Then we visit the other Ministers,

the labor, and are encamped near the of the Supreme Court and the Marworks, at a spring of water. After | shal of the Kingdom, then we take the heavy rains of the beginning of a drink. Then the Admiral invites the year, the water seeping out from the Ministers to lunch, and they take a drink. Next day or so the Minister takes the whole party to the palace, and they are presented in due form to His Majesty. The Admiral reads a little speech, in which he tells His Majesty how glad we are to see him, and His Majesty reads a little speech in which he repties how glad he is to full will no doubt be sufficient to see us. Then we talk a while with stand an eighteen months drought, all the grandees, and after backing allowing for evaporation and stock out of the presence sign our names in a little book, and the Admiral hurries on board the vessel to get his kidneys relieved from the pressure of his sword-belt as soon as possible. Meantime all the other Lancet gives a summary of the an- other country under Heaven, have anal report of the Trinidad Leper | been sending notes to the Minister, Asylum. Dr. Rakes speaks of the begging him to name the happy difficulty of controlling the immoral day when it will please the Adand criminal class of lepers, without miral to send a boat for them to come aboard, and have a salute fired for them. Then one of the commissioners gets mad because he did not get as many guns as he Out of the 16 deaths, only one was thought he ought to have had, and directly due to the leprous disease. the Minister has three months' correspondence on his hands before that is settled. You think it is all over now? The trouble is only about to begin. There are dinners, lunch parties, dances, serenades, visits to be paid, and the

THE ARGENTINE REPUBLIC.

call before the week is out .- S. F.

The brief confusion in the political affairs of the Argentine Republic brings to the attention of the states of South America. It occupies the best lands of the temperate zone of that continent. It has an area of 1,095,000 square miles, and a population of 4,200,000 souls. Its people are the result of a mixture with the many waterfalls and cascades in the immediate neighborhood. most civilized of the Indian races.

The principal products of the Argentine Republic are wool, hides, tallow, linseed, sugar, corn, wheat, tobacco, tea and fruits of several kinds. It also exports coffee silver, coal, salt and alum. Its foreign trade amounts to about \$100,000,leges for the education of its people.

DR. J. COLLIS BROWNE'S CHLORODYNE.

THE ORIGINAL and ONLY GENUINE. Advice to Invalids.—If you wish to obtain quiet refreshing sleep, free from headsche, relief from pain and anguish, to calm and assunge the weary achings of protracted disease. It vigorate the nervous media, and regulate the circulating systems of the body, you will provide yourseif with that marvellous remedy discovered by Dr. J. Collis Browne (late Army Medical Staff), to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

CHLORODYNE is the bestremedy known for Coughs, Consumption, Bronchitle, Asthma.

CHLORODYNE acts like a charm in Diarrheea, and is the only specific in Choicea and Dysentery.

CHLORODYNE effectually cuts short all

CHLORODYNE effectually cuts short all attacks of Epilepsy, Hysteria, Palpitation, and CHLORODYNE is the only palliative in Noralgia, Rhenmatism, Gout, Cancer, Toothacks Meningitis, &c.

Meningitis, &c.

From Symes & Co., Pharmaceutical Chemists, Medical Hali, Simila, January 5, 1880. To J. T. Davenport, Esq., 33, Great Russell Street. Bloomsbury, London. Dear Sir, We embirace this opportunity of congratulating you upon the wide-spread reputation this Justice estemmed medicine, Dr. J. Collis Browne's Chlorodyne, has carned for itself, not only in Hindestan, but all over the East. As a remedy for general utility, we must question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other branes, we are sorry to say, are now relegated to the native blames, and, Judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances det infairement of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhesa and Dysentery. Spaces Cramps, Neuralgia, the Vemiling of Pregnancy and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhesa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power we have never used any other form a sime Conviction that It is decidely the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Erowne's is a delinearte Burache of Partin cy The Chemistry of Prescular and the public, as we are of opinion that the substitution of any other than Collis Erowne's form a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Erowne's controlling. His Excellency the Vicercy's Chemistes.

CAUTION.—Vice-Chancellor Sir W. Page Wood stated that Dr. J. Cellis Browne was undonbtedly, the Inventor of Chierodyne; that the story of the defendant Freeman was deliberately untrue, which, he regretled to say, had been sworn to.—See "The Times," July 13

Sold in bottles at 1s. 1%d., 2s. 5d., 4s. 5d., and 1is. each. None is genuine without the words "Dr. J. Collis Browne's Chiorodyne" on the Government stamp. Overwhelming medical testimony accompanies each bottle. Caution.-Beware of Piracy and Imitations Sole Manufacture—J. T. DAVENPORT, 23 Great Russell Street, Bloomsbury, London, 1304 6m
